IN-LINE CONVEYOR WEIGHING SYSTEM

Durability, Dependability, Accuracy

The Tare TZ-100 Zone inline conveyor weighing system is one of the most efficient and flexible check weighing systems available. The high-speed conveyor, 80 feet per minute, provides exceptional package throughput. Photocells monitor the scale's entrance and exit and coordinate in-feed indexing and output control.

OPTIONS:

- Label printer
- Bar code scanner
- Conveyor diverters
- Sort packages by high/low
- Sort packages by in/out tolerance
- Optional conveyor sizes

Tare Care....

It's the heavy-weight that provides an exclusive Guaranteed Next Day Component Replacement program, access to Tare's Toll-Free Hotline and a whole lot more.

Ask your Authorized Dealer for details.

Tare's 3-section inline weighing package weight and size for station provides unlimited weighing and automatic computer data entry. The Automatic weighing, package control, and high speed - One system does it all.
